

MEHEDI HASAN

Web Developer

Narayanganj, Bangladesh | +880 1355-025437 | mehedit.dev@gmail.com

[Portfolio](#) | [LinkedIn](#) | [GitHub](#)

Career Objective

Web Developer skilled in Next.js, React.js, Node.js, Express.js, and MongoDB. Passionate about building scalable web applications and continuously growing as a full-stack developer.

Skills & Abilities

Front-end — Next.js, React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS,

Back-end — Node.js, Express.js

Database & Auth — MongoDB, JWT Authentication, Better Auth

Payments — Stripe

Tools — Git, GitHub, Vercel, VS Code, Chrome DevTools, Figma

Interpersonal — Team Collaboration, Communication, Problem Solving, Quick Learning

Projects

FitZone — Full-Stack Gym Management Application — [Live Site](#) | [Client](#) | [Server](#)

- Solved the challenge of serving three different user types on one platform by building role-based dashboards for Members, Trainers, and Admins, each with tailored stat cards and controls
- Increased community engagement by building a forum with like/dislike voting and a full comment system, giving members a space to interact and share feedback
- Eliminated payment friction and manual booking errors by integrating Stripe for secure checkout and Better Auth for reliable, role-aware authentication

Technology — Next.js, Express.js, MongoDB, Better Auth, HeroUI, Tailwind CSS, Stripe

StudyNook — Study Room Booking Platform — [Live Site](#) | [Client](#) | [Server](#)

- Protected user accounts from session hijacking by implementing JWT authentication with HTTP-only cookies
- Solved the problem of users struggling to find the right room by building an advanced search and filtering system
- Prevented scheduling conflicts and double bookings with an automatic conflict detection system, ensuring accurate room availability

Technology — React.js, Tailwind CSS, Node.js, Express.js, MongoDB, JWT, Firebase

Vromon AI — AI Travel Discovery Platform — [Live Site](#) | [Client](#) | [Server](#)

- Simplified travel planning by building a streaming AI chatbot (Groq Llama 3.3) that delivers personalized destination recommendations grounded in real package data
- Solved package discovery friction by building an explore system with filtering, search, and detailed package pages
- Secured the platform with Better Auth (frontend) and JWKS-based token verification (backend), keeping protected routes and user data safe

Technology — Next.js, TypeScript, Tailwind CSS, Express.js, MongoDB, Groq AI

Education

Higher Secondary Certificate (HSC) — Science

Sonargaon Government College, Narayanganj, Bangladesh | 2023
