

MEHEDI HASAN

Full-Stack Developer (MERN)

Narayanganj, Bangladesh | +880 1355-025437 | mehedits.dev@gmail.com

[Portfolio](#) | [LinkedIn](#) | [GitHub](#)

Career Objective

Full-Stack Developer skilled in the MERN stack (MongoDB, Express.js, React.js, Next.js, Node.js), with experience designing role-based authentication, REST APIs, and database-driven SaaS applications end-to-end. Comfortable owning a feature from database schema and API design through to a polished, high-performance UI.

Skills & Abilities

Back-end — Node.js, Express.js, RESTful API Design

Database & Auth — MongoDB, JWT Authentication, Better Auth

Front-end — HTML5, CSS3, Tailwind CSS, JavaScript (ES6+), React.js, Next.js

Payments — Stripe

Tools — Git, GitHub, Vercel, VS Code, Chrome DevTools, Figma

Interpersonal — Team Collaboration, Communication, Problem Solving, Quick Learning

Projects

FitZone — Full-Stack Fitness & Gym Management Platform [Live Site](#) | [Client](#) | [Server](#)

- Designed a Node.js/Express REST API with role-aware authentication (Better Auth) and MongoDB schemas to serve three user types — Members, Trainers, and Admins — through a single backend, surfaced as role-based dashboards on the frontend
- Built server-side pagination, filtering, and search endpoints to efficiently query and serve hundreds of classes without overloading the client
- Integrated Stripe on both client and server for secure checkout, with webhook handling to keep booking and payment state in sync
- Built a forum module (MongoDB models, API routes, and React UI) with like/dislike voting and a full comment system, giving members a space to interact

Technology — Next.js, Express.js, MongoDB, Better Auth, HeroUI, Tailwind CSS, Stripe

StudyNook — A Study Room Booking Platform [Live Site](#) | [Client](#) | [Server](#)

- Implemented JWT authentication with HTTP-only cookies on the Express server to protect user sessions from hijacking
- Designed a booking conflict-detection algorithm and MongoDB schema to prevent double bookings and keep room availability accurate in real time
- Built advanced search and filtering API endpoints, paired with a React front-end, so users can quickly find the right room

Technology — React.js, Tailwind CSS, Node.js, Express.js, MongoDB, JWT, Firebase

Book Swap — Borrow and Lend Books Through a Community Platform [Live Site](#) | [Client](#)

- Prevented unauthorized access by securing routes behind an authentication system, keeping user data safe
- Solved the friction of coordinating book exchanges by building a request-based borrowing and lending system
- Made book discovery effortless with a clean, easy-to-browse interface for finding available books

Technology — Next.js, React.js, Tailwind CSS, Better Auth

Education

Higher Secondary Certificate (HSC) — Science

Sonargaon Government College, Narayanganj, Bangladesh | 2023

Language

Bangla — Native | English — Intermediate | Hindi — Intermediate
